## **Automakers Develop Framework for Automotive Cybersecurity Best Practices**

**WASHINGTON, DC JANUARY 19, 2016** – “The automobile industry is driving an unprecedented wave of innovation as automakers pioneer groundbreaking technologies that make cars and trucks ever safer. Computing systems help enable many of these automotive technologies, making cybersecurity a top priority – just like it is in any other industry sector using computer systems. Automakers are proactively and collaboratively addressing potential cybersecurity challenges so the industry can continue producing ever safer vehicles that incorporate modern and robust security protections.

“Building on industry-led initiatives such as the launch of the Automotive Information and Sharing Analysis Center (Auto-ISAC), the auto industry has developed a Framework for Automotive Cybersecurity Best Practices and is now working on best practices. Through continued collaboration with industry stakeholders, security researchers, academia, and government agencies, as well as initiatives like the Auto-ISAC, automakers are incorporating security – and privacy -- protections into automobiles.”

###

The Association of Global Automakers, Inc. represents international motor vehicle manufacturers, original equipment suppliers, and other automotive-related trade associations. We work with industry leaders, legislators, and regulators to create the kind of public policy that improves vehicle safety, encourages technological innovation, and protects our planet. Our goal is to foster a competitive environment in which more vehicles are designed and built to enhance Americans’ quality of life. For more information, visit [www.globalautomakers.org](http://www.globalautomakers.org).

The Alliance of Automobile Manufacturers (Auto Alliance) is a trade association representing 12 automakers. Together, our mission is to promote policies that give automakers the freedom and control to build cars and light trucks that are safe, reliable, energy efficient, clean and smart – all so our customers can enjoy greater peace of mind as they go about their daily lives. Members include BMW Group, FCA US LLC, Ford Motor Company, General Motors, Jaguar Land Rover, Mazda, Mercedes-Benz USA, Mitsubishi Motors, Porsche, Toyota, Volkswagen Group of America and Volvo. Visit [www.AutoAlliance.org](http://www.AutoAlliance.org) for more information.
